Build key foundations for every young homeschooler with learning that's as playful as it is effective. High-interest reading passages extend learning beyond the movie to reinforce key vocabulary, deepen topic understanding, and promote stronger comprehension. These texts now include built-in vocabulary and sentence scaffolds to support a wider range of learners while helping all students engage more deeply with what they're learning. *Previously known as Leveled Reading, Connected Texts have been renamed to reflect their stronger tie to the topic content and enhanced literacy support. Think of it this way: BrainPOP Family: Perfect for families who want their kids to explore fun, educational topics on their own. Includes educational movies, quizzes, games, and 2 child profiles. BrainPOP Homeschool: Designed specifically for homeschooling parents and teachers. Get tools to create assignments, track progress, access lesson plans, and manage up to 4 student profiles—all from a dedicated Teacher Dashboard. Helping kids understand their world Watch How "BrainPOP is an essential engagement tool that allows both students and teachers to be involved in the learning process." "BrainPOP has really evolved by increasing the depth of knowledge needed to answer quiz questions, and playful assessments that allow students to explain their reasoning while playing a game." "Whether it is having students infer Moby's beeps or having students map out their understandings with the Make-a-Map tool, BrainPOP is great at reinforcing skills and concepts students are learning." "My teachers love BrainPOP for its refreshing humor and layered instruction. And the variety of supporting material (concept map tool, activity sheets, quizzes, and even GameUp) provide students with additional ways to connect to the concept." "BrainPOP and GameUp play the important role of trusted digital media specialist ... providing a level of curation that is a great starting point for using games in the classroom." "The addition of primary sources goes beyond any textbook and extends my students' learning in a relevant and meaningful way." "BrainPOP is a wonderful differentiation tool and reaches a wide range of students. Interactive assessments such as built-in games are the most useful because they serve to immediately engage students." "From a teacher's perspective, SnapThought provides an amazing portfolio piece -- kids writing in their own words about what is happening inside a game." "Using the Make-a-Map tool has pushed my students to think in ways that go beyond expectation ... not just to demonstrate knowledge, but to research and make cross-topic connections. It's our favorite element of BrainPOP." "The class summary view provides the perfect snapshot to quickly sort through data and differentiate instruction on the fly." "The Admin Dashboard allows me to easily manage the staff and student accounts at my school, and is especially useful when I need to quickly add a new student to a class." "With the Mixer, I can customize my own quizzes, and that allows me to differentiate for both kids on level and those with special needs." "Playing a role in the BrainPOP certified educator program has been really exciting for me ... moving forward, it's important for me to understand the newest tools and be able to work with other teachers to use them." © 1999-2025 BrainPOP. All rights reserved. "We have used BrainPOP [products] extensively to conduct research about people, animals, and topics like AI and neurodiversity...students have become better critical thinkers, and they have learned how to utilize [the resources] to deepen their learning."Digital Learning Coach, Irving Independent School District, Irving, Texas "My students are thrilled every time they see BrainPOP"every time they see BrainPOP. "We hear this from teachers constantly—how BrainPOP turns everyday lessons and complex concepts into something students can't wait to experience. With BrainPOP, students feel energized, engaged, and connected with content that feels like it was made just for them.
