Technology and Innovation For some, the word 'impossible' ends discussions. For us, it's a starting point.One of Fortunes Most Innovative Companies Were Defining Possible Every DayAs a national resource, our industry plays a critical role in supporting the warfighter to maintain global and economicstability and protect the security of America and its allies.Sustaining American military superiority demands more than words alone requires continuous innovation, industrialreadiness, and collaborative partnerships. These are the defining strengths of Northrop Grumman proven andindispensable role in equipping and protecting Americas warfighters. In the modern era, superiority isnt defined by stockpiles alone its defined by capabilities so advanced, so unassailable, that they alter how adversaries calculate the risk of conflict, so aggression is prevented before it even starts. Fortunately, the United States possesses a powerful defense industrial base that unites the trusted expertise of establishedleaders with the fresh thinking of new partners. This ecosystem is a strategic national resource that has kept the U.S. at the forefront of global military capability. Andits how America will stay ahead of whatever comes next. As an innovation leader and a cornerstone of Americasdefense manufacturing base, Northrop Grumman doesnt just imagine breakthrough capabilities we invent and buildthem. We create the technologies that define modern warfare and our expertise is consistently sought out by industry partners who turn to Northrop Grummans unique expertise to transform bold ideas into operational realities. Thats how we build real systems that provide real defenses. Our satellites see what others cant. Our 6th Generation aircraftcan go where others wont. Our technologies set the pacing throng, leading the way where others with less expertise andexperience hesitate.Yes, our work is complex. But our purpose is simple: to protect the nation, push the boundaries of whats possible, andensure the U.S. and its allies stay aheadtechnologically, strategically, and decisively.Everything we do is focused on one goal: keeping Americas global leadership secure and maintaining peace throughundeniable strength.As an American manufacturer and trusted innovator, we build, test and field capabilities faster to respond to current and emerging needs. There are numerous benefits to developing and manufacturing technologies domestically. For our customers, this can shorten lead times, increase cost savings, provide more opportunities for oversight and enhanced security as well as supply chain resilience. With nearly 100,000 employees and over 30 million square feet of manufacturing space we have the capacity, scale, and agility to drive innovation at unprecedented speeds. Our manufacturing approach isnt just about flawless production, it was developed to accelerate and enhance the entire process from design and development to production and testing. Were invested in U.S. infrastructure, R&D, our workforce, and our supply chain to deliver the national security needs of today and for tomorrow. By Kate Mauss and Katelynn JoynerNorthrop Grumman delivers world-changing technology, built on its rich legacy of designing and manufacturing innovative solutions for the future. The company has the capacity needed to meet the demands of today and the ability to scale to meet future national security needs. Heres how Northrop Grumman is furthering American manufacturing strength for the American warfighter: Investing Heavily in the Future: \$13.5 Billion Infusion. In the past five years, Northrop Grumman has invested \$13.5 billion in U.S. infrastructure and research and development. This investment isnt just about numbers; its about establishing robust manufacturing facilities nationwide that will create a legacy of American jobs, powering economic and defense capabilities. Expanding Production Capabilities: \$1 Billion in Facilities. In a bold move to expand production capabilities, the company has invested over \$1 billion alone in multiple facilities across multiple states over the past six years. This strategic investment bolsters Northrop Grummans ability to produce weapons and missile components, including essential solid rocket motors. Delivering Unmatched Manufacturing Scale: 30 Million Square Feet. With over 30 million square feet of manufacturing space, Northrop Grumman has the scale and agility to drive innovation at unprecedented speeds. This expansive capacity allows for rapid adaptation and deployment of next-generation technologies. Leading Propulsion Innovation: 1.3 Million Solid Rocket Motors. With more than six decades of flight-proven propulsion, Northrop Grumman is an industry-leading provider of solid rocket motors for critical U.S. strategic weapons systems, the civil space industry, and commercial launch service providers. To date, the company has delivered over 1.3 million solid rocket motors. Produced in Utah, West Virginia and Maryland, our solid rocket motorsare in continuous production, while the team simultaneously designs revolutionary new capabilities to meet evolving demands. Pioneering Microelectronics: One Million Microchips Annually. Across the companys microelectronicsfoundries in California, Maryland and Florida, Northrop Grumman produces more than one million microchips annually. This includes the worlds fastest terahertz microchip operating at 1,000 times faster than the average smartphone. Northrop Grumman is the only defense company with two secure foundries and an advanced packaging facility on U.S. soil. Powered by Human Capital: A Workforce Thats 100,000 Strong. Northrop Grummans ability to scale production and deploy new capabilities is underpinned by its nearly 100,000 employees across multiple functions. Our workforce has facilities in all 50 states and work in some of the most cutting-edge manufacturing facilities and engineering design labs worldwide. Building a Robust Supply Chain: 12,000 Suppliers. Designed to support with the scale and speed today's defense industry requires, our performance-driven ecosystem boasts a network of nearly 12,000 suppliers, primarily based in the United States. This robust supply chain ensures Northrop Grumman can deliver advanced, affordable and interoperable technologies to meet the mission needs of the customer. Delivering Advanced Manufacturing: One Fuselage Every 30 Hours. At the company's F-35 Center Fuselage Integrated Assembly Line in Palmdale, California, Northrop Grumman delivers one center fuselage every 30 hours. This groundbreaking work is an example of one of the most advanced manufacturing facilities ever assembled to produce military aircraft, using automated technology coupled with the strengths of humans and machines to produce for all three variants of this fifth-generation fighter. With nearly 100,000 employees and over 30 million square feet of manufacturing space more than 500 football fields we have the capacity, scale, and agility to drive innovation at unprecedented speeds. Our manufacturing approach isnt just about flawless production, it was developed to accelerate and enhance the entire process from design and development to production and testing. Were invested in U.S. infrastructure, R&D, our workforce, and our supply chain to deliver the national security needs of today and for tomorrow. {"themeOptions": {"name": "PCS Default", "customTheme": {""varTheme": {""primary-color": "#2c8cc9", "button-primary-background-color": "#2c8cc9", "button-primary-border-color": "#2c8cc9", "button-primary-text-color": "#ffffff", "button-primary-shape-border-radius": "4px", "button-primary-hover-background-color": "#2c8cc9", "button-primary-hover-text-color": "#ffffff", "button-secondary-background-color": "#f6e999", "domain": "ngc.com", "configPath": "PCS">"}, "updatePath": "PCS">"} false {"domain": "ngc.com", "user": ""}, "isWillingToRelocate": false, "isUserAuthenticated": false, "isUserETXCandidate": false, "isDomainETX": false, "isDomainVeteran": false, "signUpConfig": {}, "getHelpButton": {}, "isCareerPlannerEnabled": false, "enableRememberMeOption": false, "isMyApplicationsEnabled": false, "showVeteranEmployerSignUp": false, "enableUserPreferenceSelection": false, "isUserPreferenceApplied": false, "candidate": {"enc_id": 0, "full_name": " ", "first_name": " ", "last_name": " ", "skills": {}, "email": " ", "phone": " ", "location": " ", "file_name": " ", "started_positions": {}, "resumeUrl": " ", "onboardingCompleted": false, "isUserNcsJpp": false, "linkedInUrl": " ", "branding": {""enableTalentNetwork": 1, "showIbid": 1, "privacy": {"title": "Data Privacy Agreement", "text": "Please confirm you agree to the Data Privacy Policy (US) or Data Privacy Policy (International) laws.
